

Product Owner

“Neurodegenerative diseases models”

NETRI is an industrial start-up developing innovative technologies for the pharmaceutical industry. In everything NETRI does, it believes in challenging the way we discover new treatments. NETRI uses neural activity at the network level to translate mode of action of any drugs. NETRI designs, manufactures and sells standardized neuro organsoids-on-a-chip. Its patented organs-on-chip technologies allow the creation of standardized and predictive human *in vitro* models. This allows to anticipate the efficacy of an innovative treatment, to accelerate preclinical research phases, and to reposition compounds on new indications, while limiting animal testing. The use of human neural circuits coupled with multiple cell types opens the way to more personalized medicine as well as faster and more relevant diagnostics. Current application areas include neurological disorders, dermo-cosmetics and toxicology.

Description

We are looking for a Product Owner specialized in neurodegenerative diseases (particularly in Alzheimer disease, Parkinson disease and amyotrophic lateral sclerosis) with at least 10 years of experience in the pharmaceutical industry.

Your missions

- Participate in Research and Development projects on behalf of NETRI's Research Department and on behalf of NETRI's clients under the responsibility of the Service Manager,
- Understand and reflect the needs of the end-users,
- Define the Key Differentiation Factors that will ensure the competitiveness of the product on the market,
- Lead and approve the creation of the Functional Requirements Specifications,
- Participate in the implementation of the project with the project management teams.
- Guarantee the proper evolution of the product during its development
- Participate in the drafting of dissemination documents,

Job Specifics:

You will interact with our multidisciplinary teams on a daily basis and participate in multiple projects in parallel.

Profile sought

- Are you agile, passionate and daring?
- You have a PhD in neuroscience and significant experience in pharmaceutical industry in preclinical or clinical development?
- You have at least 10 years of experience in neurodegenerative diseases?
- You like to work in a team and share your knowledge?
- Do you want to join an industrial startup with an innovative project that makes sense?

You are surely the person we are looking for, join the NETRI adventure!

Send us your CV and cover letter to: jobs@netri.com
